

Contractor Services

Committed to providing cost-effective solutions that make you more effective!

CE Power Solutions is committed to providing quality products and services to complement those offered by contractors, including engineering, testing and a product offerings.

Testing Services

PHOTO TBD

- Cable proof-testing and maintenance testing
- Comprehensive transformer testing
- Relay calibration and testing
- Primary and secondary injection circuit breaker testing
- Ground systems testing
- Thermography and infrared services
- Motor vibration analysis and balancing services
- Field UL certification services
- Test equipment calibration, glove and stick testing and certification

Engineering Services

PHOTO TBD

- Professional Engineering (PE) services
- Drafting composition and “red line” upgrades
- Drawing certification
- Relay protection coordination
- Short circuit analysis
- Power factor correction analysis
- Power Quality analysis studies
- Ground-fault system studies
- System design services
- Field engineering services

Product Offerings

PHOTO TBD

- Transformers—dry type, substation padmount
- Motors—authorized distribution for major manufacturers
- Switchgear and circuit breakers—authorized OEM
- Relays, motor protection, voltage and current monitors
- Ground fault-ground check monitors and relays
- Power resistors, varistors, MOVs, thyrites
- Bus transitions and systems
- Switches—load-break and non load-break, high-pressure
- Knife switches, crane controls
- Test equipment—Hi-pots, Meggers, etc.
