

Padmount Switchgear Solutions

Committed to providing cost-effective solutions that make you more effective!

CE Power has developed a unique option for replacing existing padmount switchgear with our new PMH recovery product. Recovering existing padmount switchgear with new mechanism and dead-tank interrupters offers tremendous construction cost savings as well as installation time savings. This unique solution also provides ecological and asset management benefits, making it a sound option for today's budgets and environmentally conscious facilities.

- Direct replacement retains all primary conductor
- Improved switching life
