

Replacement Power Modules for Precipitator TR Sets

Committed to providing cost-effective solutions that make you more effective!

Practical Solutions for Precipitator TR Set Power Modules ...

CE Power has designed replacement power modules for precipitator/TR set 480 volt feeders.

Improved Design

Easy Maintenance

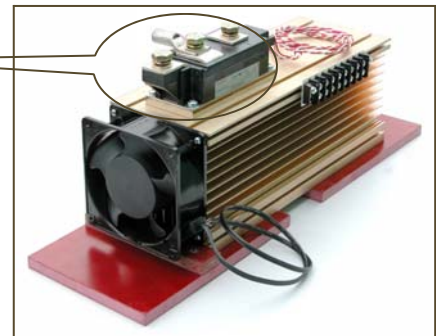

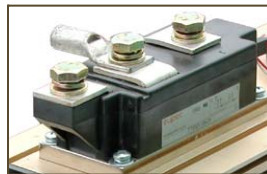

Easy Installation

Enhanced Performance

At Issue:

- Beginning to fail
- Delicate repair—gel, alignment and torque values
- Quality and reliability concerns on rebuilt units
- Stock of components required

Solution:

- New “entire” replacement module
- Easy “Plug and Play” installation
- No stocking of components

New Replacement Modules Deliver:

- Fit, form and function
- Advanced technology SCR/Diode component—module on top of heatsink, easy to replace, if necessary
- Matched footprint
- Only 1 cooling fan
- Easy connections
- Minutes to install replacement modules
