

Committed to Safety and Training

Safe, Reliable, Cost-Effective Solutions for the Electrical Power Industry.

CE Power Solutions is committed to providing safe, reliable solutions to the electrical power industry in a cost-effective manner. In order to achieve this, we've intensified our efforts in providing safety and technical training to our Employees and to our Clients. CE Power remains committed to preparing the next generation of power professionals through apprenticeships, internships and on the job training (OTJ) Programs.

Industry Leader...

- EMR Rating •
- Training Hours Per Technician •
- Investment in Safety and Technical Training Per Employee •

Safety Awareness and Training

- EMR Rating of **Less than 1.0** since inception in 2001
- Three times national average invested in training annually*
- Dedicated Corporate Safety Director to ensure compliance and consistency
- Documented Safety Toolbox and Safety Audits
- Designated Safety Representative at each CE Power location
- Safety Program—compliant with **OSHA, NETA, ISNetworld** and **PICS Auditing**
- **29 CFR1910 and NFPA 70E and 70B** safety training compliance adherence
- Annual OSHA, MSHA and Passport Certifications

Technical Training

- Average of 10% of hours worked go toward training annually
- AVO, Doble, Schweitzer, Omicron, Weidmann training sessions
- Members of Doble Engineering
- Continuing Education Opportunities/Tuition Reimbursement
- Licensed PE on staff
- Apprenticeship program

Specialized Testing and Equipment Training

- **Transformer Testing:**
 - ◇ Doble Power Factor, TTR, SFRA, Partial Discharge, Winding Resistance, Polarization Index, Oil Sampling/Analysis
- **Circuit Breaker Testing:**
 - ◇ High Current/Primary Injection, Timing and Motion Analysis of High Voltage Breakers, 200A Micro-Ohm Resistance Testing, Partial Discharge & Vibration Analysis, Doble Power Factor, Insulation Resistance Testing, Secondary Injection Testing
- **Relay Testing:**
 - ◇ Schweitzer (SEL) Master Service Provider, Omicron Factory Training
 - ◇ End-to-End Directional Compliance Testing
- **Cable Testing:**
 - ◇ AC VLF Withstand, Tan-Delta and Partial Discharge Diagnostic, Fault Location, DC Hi-Potential, Polarization Index, Shield Continuity
- **Bus Systems:**
 - ◇ AC Hi-Potential, 200A Micro-Ohm Resistance, AC VLF Withstand, Infrared Thermography

* National Average as defined by a study published by Bersin & Associates, v2008
