

# Precipitators: Transformer Rectifier Upgrade & Maintenance Services

*Committed to providing cost-effective solutions that make you more effective!*

Optimal precipitator performance and system longevity can be achieved through CE Power Field Services Solution — TR Performance Evaluation Services. Transformer Rectifiers are reaching their 25-30 year performance cycle and are in need of a thorough evaluation to determine maintenance tasks and budgets.

## CE Power Performs:

- Physical inspections—corona, leaking, tracking, rust, etc.
- Electrical Performance Tests—TTR, Megger, Continuity and Winding Resistance
- Reliability Assessment Program (**RAP**) featuring **TRIAD** (Transformer Rectifier Insulator Analysis Detail) Reports
- Comprehensive report with recommendations

Reliability Assessment  
**TRIAD**  
Program

## Customers Receive:

- Prioritized Report defining “At Risk”, “Marginal”, and “Suitable” TR’s
- Trending Analysis allows maintenance planning and budgeting
- Performance and Reliability Program for TR’s

*For optimal precipitator performance, call CE Power Solutions now to inquire about TR maintenance and testing capabilities; and our unique, proactive approaches to ensuring system integrity.*
